Terms of Delivery

1. Pricing

All prices in this list are retail prices in US\$, local and state taxes to be added. Cost for shipping and handling are not included and shall be charged separately. These depend on volume and distance to be shipped, please inquire for your specific order.

2. Payment

We accept payments by any of the following means:

- Credit card
- Money order
- Pre payment
- Cash

3. Reserved ownership

The supplier reserves ownership on all goods delivered until full payment has been received.

4. Refunds on return of goods

In case of non satisfaction products may be returned in the original packaging within 14 days after delivery for a full refund on the purchase price if they are in as new condition.

5. Delivery

Your order shall always be processed as quick as possible. Our US-inventory, however, carries only a selected range of products at any time. In case of items not being available from US-inventory please allow for four to six weeks for delivery.

6. Damages

In the unlike event of your goods arriving damaged, let us know immediately. We shall take any effort to make sure that you will receive a replacement as soon as possible. In any case it is extremely important that you keep the damaged goods and the packaging for a possible inspection if an insurance claim is filed and required by the U.S. Post Office or other carriers.

7. Warranty

Obvious defects of any product received must be reported in writing within one week after delivery, hidden defects immediately after recognition. In case of a claim made after one week, the products may be repaired or exchanged at suppliers discretion.

A final word:

All products presented have been carefully designed for their intended purposes.

The materials chosen are considered to be the best available in order to achieve the functional objectives pursued. In particular acrylic is a material which combines a shiny and brilliant appearance with all the processing requirements needed.

By combining acrylic with brass (for the rails) in case of the *TRAIN-SAFE*-Vision and *TRAIN-SAFE*-Roll tubes a well known physical effect eventually is observed, which relates to expansion by changes in temperature of the different materials. This effect may sometimes lead to very slight bending of these extremely slenderly shaped bodies and must not be seen as a defect in the product. It is a simple physical effect which is reversable to a large extend and does by no means impair any of the useful properties and functions built in.
